

Dear sir/madam,

We invite you to the International Conference:

## **HOW TO DEAL WITH UNCERTAINTIES IN INCREASINGLY COMPLEX ENVIRONMENT? (The new cartography of risk and crises)**

September 29 – 30, 2022, 'Croatia hotel', Cavtat (Dubrovnik), Croatia

Co-Organized by:

**Center for Risk Analysis and Crisis Management (Belgrade) and  
Croatian Association for International Studies (Zagreb)**  
In collaboration with academic and other relevant institutions

This is a unique international event that will gather prominent international and regional experts and professionals with the objective of knowledge and experience exchange on management of contemporary risks and crises. The strategic goal of the conference is to establish a permanent forum and dialogue for exchange of scientific and practical expertise that will serve to political/strategic, local and organizational actors as a guide for development and implementation of sectorial policies, precisely defined actions and activities important for the uncertainty management in the contemporary strategic and operational environment.

The topics include theoretical and practical context, as well as geopolitical, environmental, security, economical and social challenges, with the aim to support strategic decision makers in public and private sector in planning, implementation and continued improvement of management capacities.

The conference will be held in hybrid (virtual and in-person) format. All positively reviewed papers will be published in the Conference Proceedings.

For more details on the conference, including the registration form, please visit:
